

ASTRONOMICAL and ASTROPHYSICAL TRANSACTIONS

Journal of the *Eurasian Astronomical Society*

ISSN: 1055-6796 | Volume 31 | Issue 2 | pages 61–236

**Magnetism, activity cycles and
flares on the Sun and stars**

Cambridge Scientific Publishers

Table of contents

Preface	
V.I. Abramenko	61
Turbulent and fractal nature of solar and stellar magnetism	
V.I. Abramenko	63
Time variations of the total unsigned magnetic flux of active regions during the solar cycle 24	
A.V. Zhukova, V.I. Abramenko, A.S. Kutsenko	75
Features of evolution of the magnetic field gradient in solar active region before a strong flare	
A.A. Solov'ev, V.E. Abramov-Maximov, V.N. Borovik, L.V. Opeikina, A.G. Tlatov	89
Forecast of solar flares from observations in the microwave range at the Kislovodsk Station	
A.D. Shramko, A.G. Tlatov, S.A. Guseva	103
Solar activity according to the data of 100-year series of observations	
K.A. Tlatova, V.V. Vasil'eva, A.G. Tlatov	109
Activity cycles and properties of sunspot bipoles	
A.G. Tlatov, K.A. Tlatova	117
Peculiarities of the photospheric line-of-sight velocity field in the active region NOAA 12403 at the time of M2.9 solar flare	
A.N. Koval, A.N. Babin	125
Statistical investigations into low-power solar flares	
A.V. Borovik, A.A. Zhdanov	133
Nonstationary processes in the active region on the Sun before, during, and after the LDE-flare	
A.N. Shakhovskaya, I.Yu. Grigoryeva, E.A. Isayeva	147
Evolution of photospheric currents during the development of the M4.0 flare on September 26, 2011	
I.Yu. Grigoryeva, I.I. Myshyakov, G.V. Rudenko, M.A. Livshits	159
Photospheric magnetic fields during flares	
O.S. Gopasyuk	171
On the role of preflares in tornado-type prominences	
Yu.A. Kupryakov, P. Kotrč, L.K. Kashapova	177
The emergence of magnetic fields with hypersonic velocities as a source of flare activity in the solar chromosphere	
K.V. Romanov, D.V. Romanov, V.A. Romanov	183
On the dependence of the solar wind velocity on the fractional area of coronal holes in latitude	
Z.S. Akhtemov, Yu.T. Tsap	193
